# Clean Code by Example

by M. Scott Ford

## Exercise: Practice Clean Class and Type Names

Identify the class and type names in the following list that violate one of the rules that were presented.

```python
class BadWeather: pass

class Actors: pass

class PastEvent: pass

class Closing: pass

class Alias: pass

class Canceled: pass

class Excellent: pass

class Temporary: pass
```

```python
class B: pass

class HTML: pass

class ASTNode: pass

class TheUser: pass

class BadWeather: pass

class Terminate: pass

class BAvailable: pass

class Question: pass

class Button: pass

class Activate: pass

class ClickEvent: pass
```
